## INSTALLING + UPDATING SOFTWARE AND FIRMWARE

## EPOS | SENNHEISER GSP 670

1.     Plug the dongle in your PC and power on your headset. Windows should detect the dongle automatically.
2.     Download and install the software.
3.     Restart your PC.

## Open the software suite (Sennheiser Gaming Suite)

1.     The headset should be detected automatically (visible in picture above with the red symbol (1).
2.     Click the cog-wheel to go into the settings tab.
3.     The text on the left side of the page (red and green arrows) will tell you if everything is up to date.

## About EPOS

EPOS is an audio and video solution company developing and selling devices for business professionals and the gaming community. Based on leading and advanced technologies, the Danish founded company delivers high-end audio and video solutions with design, technology and performance as paramount parameters.

The establishment of EPOS is based on the decision to let the business segments of the joint venture – known as Sennheiser Communications – between Sennheiser Electronic GmbH & Co. KG and Demant A/S evolve in different set-ups. Alongside the introduction of a new own-branded portfolio, EPOS continues to sell the current Sennheiser Communications portfolio co-branded as EPOS I SENNHEISER.

EPOS is part of the Demant Group – a world-leading audio and hearing technology group. As such, it builds on more than 115 years of experience of working with innovation and sound.

With headquarters in Copenhagen, Denmark, EPOS operates in a global market with offices and partners in more than 30 countries.
